

# Are your **bladder** or **bowel accidents** disrupting you from living a normal life?

## Axonics Therapy offers an advanced treatment solution for you

Axonics Therapy is indicated for patients who have not responded to more conservative treatments for bladder and bowel control, such as lifestyle adjustments, physical therapy, or medications.

### How does it work?

Overactive bladder, fecal incontinence and urinary retention may be caused by abnormal communication between the brain and bladder or bowel.

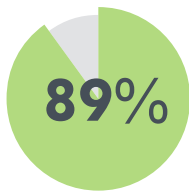

Axonics Therapy can help restore normal communication by providing gentle stimulation to help control your symptoms.<sup>1</sup>

### Who does it help?

Axonics Therapy is approved to help people with:

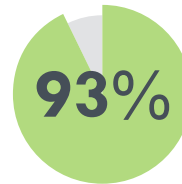

- Overactive bladder
- Urinary retention
- Urinary urgency frequency
- Bowel incontinence
- Urinary urgency incontinence

## Clinically proven. Patient approved.

*of patients achieved clinically significant improvements\*<sup>1</sup>*

\*50% or greater reduction in symptoms at 1 year

*of patients were satisfied with their therapy<sup>1</sup>*
