

BIOTE[®] MEDICAL NUTRACEUTICALS

BioTE's nutraceutical product line has been carefully created to support bioidentical hormone replacement therapy (BHRT). Featuring ingredients that help promote better health, these clinical-grade nutraceuticals are essential to ensure a complete and personalized approach to healthier aging.

CURCUMIN-SF

CURCUMIN-SF is a well-absorbed curcumin for maintaining healthy joints and muscles.*

All curcumins are not created equal. Although used for centuries as an ingredient in Asia, most forms are poorly absorbed in the bloodstream, whether coming from food or a nutritional supplement. BioTE CURCUMIN-SF has a 29x greater absorption rate compared to ordinary curcumin.*

When taken daily, BioTE Curcumin-SF helps maintain a healthy inflammatory response throughout the body.^[1] Curcumin enhances the activity of the COMT enzyme, which helps metabolize estrogen via methylation (the main way gene activity is adjusted during life!) in both men and women.^[2] In turn, it protects cells from DNA damage from improper estrogen metabolism.^[3]
